CORE COMPETENCIES

Top Safety Products Company Inc. is a unique women owned small business (WBE) headquartered in New Jersey. Our experienced team skillfully assembles quality first aid kits, trauma kits and related first aid supplies. We offer a variety of standard kits for many industries. Since we assemble our kits, we have the flexibility to create custom kits to meet a variety of needs.

Our work on delivering high-quality products to our customers is only part of our company's mission. In January of 2018 we partnered with the Midland School's Adult Services to employ a pre-assembly team, our Midland Crew. We proudly provide this four-person team with life skills and job training in a safe work environment for these teammates with intellectual and developmental disabilities. We were honored to be recognized as their 2019 Employment Partner of the Year for our commitment to their program.

As your safety needs change, we are happy to help you evaluate those needs and offer you products and services accordingly, "Because Emergencies Do Happen®"
